

# Density100 Mattress

## + Mattress characteristics

Mattress specially designed for ambulatory or hospital patients with low ulceration risk, as well as for the treatment of early stage ulcers and sores.

## + Core

- 1 High density monolithic foam core (25 kg/m<sup>3</sup>), with open cell structure that improve the air exhaust through the foam, becoming the core breathable and hygienic.

## + Core characteristics

- 14 cm. core height, which avoids the contact between patient and bed, therefore, preventing the pressure contacts.
- The core structure and composition makes this mattress suitable for all sanitary areas.
- Fireproof core according to the “Furniture and Furnishings (Fire)”, BS 5852:2 CRIB2, UNE EN 597-1 and EN 597-2 regulations.
- Ergonomic mattress, keeps the body in his natural curved position, relieved, preventing the back and cervical pain.
- Reversible and symmetric core allows using indistinctly the head or feet areas.
